

AMENDMENTS TO THE CLAIMS**RECEIVED
CENTRAL FAX CENTER****MAR 19 2007**

Claims 1 to 7 (canceled)

Claim 8 (previously presented): A substantially odor free faced glass fiber building insulation assembly, comprising:

a resilient glass fiber insulation blanket having a density of about 1.6 pounds/ft³ or less; the glass fiber insulation blanket having a length of at least 46 inches, a width of at least 15 inches, and a thickness of at least 3 inches; the glass fiber insulation blanket having a first major surface and a second major surface that are each defined by the length and width of the glass fiber insulation blanket; the glass fiber insulation blanket being substantially odorless and comprising glass fibers bonded together at their points of intersection with a formaldehyde free acrylic thermosetting binder;

a facing formed by a kraft paper sheet material; the facing having a central field portion; the central field portion of the facing having an outer major surface and an inner major surface; and

an asphalt coating layer on the inner major surface of the central field portion of the facing that bonds the facing to the first major surface of the glass fiber insulation blanket; the asphalt coating layer containing a fungi growth-inhibiting agent and an odor-reducing additive in an amount sufficient to substantially eliminate odor that would otherwise be emitted by the asphalt coating layer without adversely affecting the adherent qualities of the asphalt coating layer; and

the kraft paper sheet material with the asphalt coating layer being fungi growth resistant.

Claim 9 (canceled)

Claim 10 (previously presented): The faced insulation assembly according to claim 8, wherein:

the odor-reducing additive is an essential plant oil that is present in the asphalt coating layer in an amount approximating 1 part by weight the odor-reducing additive to 10,000 parts asphalt blend.

Claims 11 and 12 (canceled)

Claim 13 (original): The faced insulation assembly according to claim 8, wherein:
the kraft paper sheet material includes a foil layer and a kraft paper layer.

Claim 14 (original): The faced insulation assembly according to claim 8, wherein:
the kraft paper sheet material includes a foil layer, a scrim layer and a kraft paper layer.

Claims 15 to 22 (canceled)

Claim 23 (previously presented): The faced insulation assembly according to claim 8, wherein:

the kraft paper sheet material of the facing is a fungi growth-resistant kraft paper sheet material.
